Flare-XM-1 Cordless Cap Lamp MSHA Approved

The Flare-XM-1 is a rugged cordless cap lamp with the latest Lithium battery technology and high-power LED. The lamp features two power settings for main lighting and emergency lighting.

With light output of 3000 lux on main power, this lamp is suitable for most mining environments where safety and efficiency are the primary objective. The lamp is highly shock resistant and water resistant to a depth of three feet.

The lamp is ideal for a 12 hour shift with 3000 lux of light on the main power setting and a maximum discharge time of 14 hours. In addition, the lamp is light and comfortable weighing only 4.6 ounces – the lightest lamps available.

2-step switch (main or emergency light)
